Overview

The Health in India 2016 report reveals that more than 70% of spells of ailments were treated in the private sector. Many rely on borrowings for hospitalisation and a vast majority on savings. Buying medicines for non-hospitalised treatment accounts for the majority. Quality of care in another issue that worries patients.

Disturbingly, studies reported collusive behaviour in healthcare. One such study found the frequency of 'referrals' for diagnostic tests was very high; doctors usually suggested a particular diagnostic laboratory, and these tests might not have been necessary for many instances. There is a 'usual practice' of paying commissions to the referring doctors by these diagnostic labs. The Assam Healthcare Cooperative Society Ltd. is the first in the country established without government patronage to address some of these issues by leveraging the collective power of the citizens.

Our Vision

Our vision is to develop an affordable and people-centred healthcare model and promote evidence-based medicine to reduce unnecessary investigations and medicalisation.

Our Mission

Guided by the cooperative principles, we aim to create a sustainable enterprise to make medical care affordable to citizens and expand securing cooperation from other like-minded civic organisations and medical service providers; we share capabilities with them to attain a competitive advantage over the unscrupulous players.

**A growing and
sustainable model
of enterprise**

ASSAM HEALTHCARE

Established 2016

People
together
are stronger

A Citizen Driven Enterprise

The cooperatives worldwide established themselves in various segments of the economy as successful players but are not a force in the healthcare sector in India as yet. There is no reason why cooperatives can't play a critical role. The Assam Healthcare Cooperative Society strives to be a strong and caring alternative in the healthcare sector.

Services

Avail of a Discount

- At leading diagnostic centres, hospitals, clinic and pharmacies (10-40%) in Assam & New Delhi.
- Refer to the up to date list of partners (page 3).

*If you're aged 40 to 74, an annual Health-Check around your birthday is a good idea. As we get older, we have a higher risk of high blood pressure, heart disease or type 2 diabetes. Health checks can spot the early signs of these and help prevent them by supporting you to reduce risk factors. It's a great way to get personalised advice on keeping yourself healthy and active. For example, long-term complications of diabetes affect the eyes (retinopathy), heart (cardiovascular disease), kidneys (nephropathy), and nerves and feet (neuropathy), which you can prevent.

Table 1 Recommended Adult Immunization Schedule by Age Group, United States, 2020

Vaccine	19–26 years	27–49 years	50–64 years	≥65 years
Influenza inactivated (IIV) or Influenza recombinant (RIV) or Influenza live, attenuated (LAIV)	1 dose annually or 1 dose annually			
Tetanus, diphtheria, pertussis (Tdap or Td)	1 dose Tdap, then Td or Tdap booster every 10 years			
Measles, mumps, rubella (MMR)	1 or 2 doses depending on indication (if born in 1957 or later)			
Varicella (VAR)	2 doses (if born in 1980 or later)		2 doses	
Zoster recombinant (RZV) (preferred) or Zoster live (ZVL)			2 doses or 1 dose	
Human papillomavirus (HPV)	2 or 3 doses depending on age at initial vaccination or condition	27 through 45 years		
Pneumococcal conjugate (PCV13)	1 dose			65 years and older
Pneumococcal polysaccharide (PPSV23)	1 or 2 doses depending on indication			1 dose
Hepatitis A (HepA)	2 or 3 doses depending on vaccine			
Hepatitis B (HepB)	2 or 3 doses depending on vaccine			
Meningococcal A, C, W, Y (MenACWY)	1 or 2 doses depending on indication, see notes for booster recommendations			
Meningococcal B (MenB)	2 or 3 doses depending on vaccine and indication, see notes for booster recommendations			
	19 through 23 years			
Haemophilus influenzae type b (Hib)	1 or 3 doses depending on indication			

Recommended vaccination for adults who meet age requirement, lack documentation of vaccination, or lack evidence of past infection

Recommended vaccination for adults with an additional risk factor or another indication

Recommended vaccination based on shared clinical decision-making

No recommendation/ Not applicable
